2022 M600 SLS

N411JP • SN 4698229

Autoland
HALO keeps you safe when the pilot is incapacitated. HALO controls and guides the aircraft to the nearest runway for a precision landing.

Automatic Level Mode
Return the aircraft to a wings-level attitude with zero vertical speed at the push of a button.

Autothrottle
Fully integrated, standalone autothrottle, reducing pilot workloads from climb-out to landing approach by automatically adjusting the aircraft's power mode settings based on preset flight profiles.

Hypoxia Recognition System with Automatic Descent Mode
Monitors pilot interaction when autopilot is engaged at cabin altitudes above 14,900 feet. The system brings the aircraft to a lower altitude to allow recovery from hypoxia.
