LEADING THE BUSINESS OF AVIATION

AIRCRAFT SALES

2025 M700

NTBD • SN 46020XX

Autoland

HALO keeps you safe when the pilot is incapacitated. HALO controls and guides the aircraft to the nearest runway for a precision landing.

Automatic Level Mode

Return the aircraft to a wings-level attitude with zero vertical speed at the push of a button.

Autothrottle

Fully integrated, standalone autothrottle, reducing pilot workloads from climb-out to landing approach by automatically adjusting the aircraft's power mode settings based on preset flight profiles.

Hypoxia Recognition System with Automatic Descent Mode

Monitors pilot interaction when autopilot is engaged at cabin altitudes above 14,900 feet. The system brings the aircraft to a lower altitude to allow recovery from hypoxia.
